Employment History

Western Electricity Coordinating Council

Compliance Applications Developer and Support Analyst, May 2010 - Present

Developed web-based and desktop applications to increase worker productivity and workflow automation. Work duties included the following:

- Provided technical leadership and established best practices in all areas of the software development life cycle
- Created and maintained document generation, publication, and archival applications using C# and SQL
- Developed workflow automation and tracking applications using ASP.NET, C#, Microsoft SharePoint, and AgilePoint

Xennsoft Corporation, South Jordan, Utah

Programmer II, February 2007 – May 2010

Programmed web-based business software for network marketing companies. Work duties included the following:

- Acted as lead developer on several projects

- Developed new and maintained existing web-based applications using C#, .NET 3.5, .NET 2.0, and Classic ASP
- Wrote stored procedures and made schema changes for Microsoft SQL Server 2005 and 2008
- Designed, integrated, and documented software components and features
- Performed unit testing and troubleshooting
- Upgraded application code from Classic ASP to ASP.NET and C#
- Created, maintained, and consumed .NET web services

HEC Software, Inc., North Salt Lake, Utah

Software Engineer, August 2000 – February 2007

Designed, implemented, and maintained software applications, primarily for the web platform, using ASP and ASP.NET. Was in charge of several projects at every stage of development, including conception, design, deployment, and maintenance. Notable projects included:

- A teacher administration system for *Reading Horizons Online*, a web-based reading program, which included functionality for managing student records, generating reports, and setting advanced options.
- Several programs for the company intranet, including a testing and bug-tracking program, a wiki knowledgebase, a time-tracking program, an order processing system, an administration system for managing accounts, a calendar and scheduling system, and a program for storing and managing sales leads.
- Worked as part of a team developing *Reading Horizons* and *Discover Intensive Phonics*, the company's flagship reading programs, for Windows and Macintosh.
- Integration with CRM solutions, including *Salesforce* and *GoldMine*.

Kevin Owens Technology, Bountiful, Utah

Owner/Software Consultant, March 2003 – Present

Created proprietary web-based applications and developed websites and web applications for contract clients. Recent projects include:

- GMDICE.COM, an internet retail store selling tabletop games and accessories. Increased sales and revenue more than twofold since acquisition in September 2010. Site runs on a highly customized version of Magento, a PHP application.
- An ASP.NET (C#) family web application with photo management and tagging, interactive pedigree charts, document management, and genealogical tools.
- A web-based *Project Management System* which tracks projects, tasks, files, and milestones for various projects.
- E-commerce and marketing websites for several small- and medium-sized businesses

Education

Weber State University

A.A.S., Computer Science, 2011
